

Checklist

Needs Work

Meets Expectations

Exceeds Expectations

API Usage

- No API used-- employee information is hardcoded (the same employees are displayed each time the page is refreshed)
- 12 random users are pulled from the API
- New random employee information displays each time the page refreshes
- N/A

User Directory

- The directory contains less than 12 employees, or the directory is missing required information
- The directory displays 12 users from the Random User API, and includes the following for each user:
 - Employee Image
 - First and Last Name
 - Email
 - City or location
- Employees can be filtered by name with dynamically added search feature.

Modal Window

- No modal pops up when a user is clicked, or modal is missing required details.
- Modal window displays at least the following details:
 - Employee image
 - Name
 - Email
 - City or location
 - Cell Number
 - Detailed Address, including street name and number, state or country, and post code.
 - Birthday
- There is a way to close the modal window.
- Functionality has been added to switch back and forth between employees when the detail modal window is open.
- No errors in the console when the end or beginning of the list is reached.

Structure, style and CSS

- Layout and position of directory and modal window elements do not match the mockups.
 - Note: Modal window address can have the state's full name, rather than the two letter state code.
- The major elements of the directory and modal window are in place and roughly match the mockups.
 - Note: Modal window address can have the state's full name, rather than the two letter state code.
- At least one of the following has been added or changed:
 - color
 - background color
 - font
 - box or text shadows
